Portfolio: kunikabajaj.github.io

Product designer with 3+ years of experience at early-stage startups, specializing in end-to-end UX for consumer and B2B platforms. Track record of driving measurable growth through user-centric design—from scaling social channels to redesigning platforms that doubled monthly traffic. Skilled in design systems, brand identity, and translating ambiguous product ideas into shipped interfaces.

EXPERIENCE

Product Designer | ANDPAYMENTS *May 2026 – Present*

- Designed end-to-end UX for the AndPay/AndBite PPI wallet app across 15+ onboarding and KYC screens—PAN/Aadhaar verification, V-CIP video KYC, OTP and error states—grounded in RBI regulation and product requirements (BRD).
- Built the foundations of a cross-product design system—86 color variables, semantic tokens, Light/Dark modes, and spacing/radius/elevation scales—shared across a dual-library (Angular + Flutter) setup to align design and dev handoff.
- Established the brand's visual language (orange/navy palette, typography, icon system) and defined a four-tier error-state model to reduce user retries on non-retryable errors, improving flow clarity.

Founding Product Designer | PEERUP *May 2024 – May 2026*

- Owned the full product design lifecycle from zero to launch, defining information architecture, user flows, and interaction patterns for a peer-learning platform.
- Led a complete brand overhaul—logo, color system, typography, and visual identity—establishing a cohesive brand language adopted across product, marketing, and social.
- Grew PeerUp's Instagram from scratch to 148K followers by designing content strategy, templates, and reels—directly contributing to early user acquisition.
- Identified and resolved 15+ UX edge cases through user research and flow analysis, reducing onboarding friction and improving task-completion rates.

UI/UX Designer | YEARBOOK CANVAS *Jul 2023 – Mar 2024*

- Redesigned the mobile and web experience, increasing monthly unique visitors from 700 to 1,600 (+128%) within three months of launch.
- Led migration from Shopify to a custom-coded platform, implementing performance-driven campaigns that generated 30,000 sales in the first quarter.
- Created the visual identity and brand system for a new merchandising line, ensuring consistency across packaging, web, and marketing collateral.

UI/UX Designer | REFO (PART-TIME) *Feb 2023 – Jul 2023*

- Built a comprehensive design system (components, tokens, documentation) that improved design-to-dev handoff speed and ensured platform-wide consistency.
- Conducted competitive analysis across 8 platforms to redesign the business-owner dashboard, streamlining workflows and reducing average task time.
- Designed and tested data-collection forms with 50+ users, improving validation accuracy and reducing form-abandonment rates.

UI/UX Design Intern | FRONT ROW *Jun 2022 – Aug 2022*

- Audited the existing website UI and identified 5 key growth barriers; proposed and shipped design changes that increased user engagement metrics.
- Collaborated with product and instructor teams to redesign communication flows, improving the learning experience for 500+ active students.

SKILLS

Design: User-centered design, Design systems, Wireframing & prototyping, Usability testing, Information architecture, Interaction design

Tools: Figma, Adobe Photoshop, Illustrator, Premiere Pro, InDesign

AI & Productivity: ChatGPT, Heygen, Kling AI, UX Pilot

EDUCATION -- Bachelor of Design *Jul 2019 – May 2023*

Srishti Institute of Art, Design & Technology
